MYKHAILO ROSHCHYNA

Frontend Software Engineer

Clemmons, NC • (919) 899-9995 • mykhailo.roshchyna@gmail.com • LinkedIn • GitHub • Portfolio

Authorized to work in the U.S. • No Visa Sponsorship Required

PROFESSIONAL SUMMARY

Frontend Software Engineer with 6 years of experience building React and TypeScript products for cybersecurity and insurance companies. Built data-heavy dashboards, an AI assistant interface, and GraphQL APIs end to end, with a focus on accessibility, performance, and automated testing.

CORE COMPETENCIES

Frontend: React, TypeScript, JavaScript, Next.js, React Native, HTML, CSS
State & APIs: TanStack Query, TanStack Router, Redux, GraphQL, Apollo, REST APIs
UI & Visualization: Tailwind CSS, Material UI, styled-components, Sass, Highcharts, Storybook
Testing: Playwright, Cypress, Jest, React Testing Library
Backend & Tooling: Python, Node.js, AWS Lambda, Docker, Git, GitLab CI, GitHub Actions, Vite, Webpack
AI-Assisted Development: Cursor, OpenAI Codex, Claude Code

PROFESSIONAL EXPERIENCE

Frontend Developer • Booli.ai by Fulcrum Technology Solutions (Houston, TX)
Sep 2023 – May 2026 • Remote • SaaS company offering identity-centric SIEM and MDR solutions

- Redesigned and built the chat interface for Leon, an AI security assistant: conversation flow, live tool-execution states, and user feedback loops, increasing daily active usage of the AI feature by 25%
- Built and migrated 15+ production screens and reusable data grid, filter, and timeline components with React, TypeScript, TanStack Router, and TanStack Query, cutting dashboard load times by 20%
- Refactored Advanced Filters with runtime-loaded schemas and URL-based state to eliminate repeated filter setup, letting analysts save, share, and restore filter configurations across 17 pages of the app
- Developed 12+ Highcharts widgets for an executive security posture dashboard (risk scores, incident trends, ingestion health), giving CISOs a single view that replaced manual weekly reporting
- Raised test coverage from 20% to 60% on CISO and MSSP dashboards by writing 20 Playwright/Cypress component suites and E2E tests that run in GitLab CI and catch regressions before merge
- Led the React 19 migration across 70+ files, standardizing loading and error handling with Suspense and error boundaries and removing ~1,500 lines of boilerplate, with no rollbacks or production incidents after release
- Brought shared DataGrid, filter, dialog, and sidebar components in line with WCAG 2.1 AA criteria, adding keyboard navigation and focus management, plus reduced-motion support, across 15+ production screens
- Cut self-hosted font payload by 76% (from 563 KB to 134 KB) through font subsetting and WOFF2 conversion, speeding up first load

Associate Software Engineer • iptiQ by Swiss Re (Bratislava, Slovakia)
May 2022 – Jun 2023 • Hybrid • Digital insurance platform for B2B2C distribution

- Designed one public GraphQL contract for quote requests, replacing duplicate quote services and mappers across the BFF and UI so new insurance products could reuse the same flow
- Built the public GraphQL API end to end, unifying downstream REST services behind one interface used by insurance partners including Verti, Check24, and SunLife
- Added a target-premium quotation model to the Node.js/TypeScript pricing engine, supporting taxes, discounts, and multi-currency pricing for products launched with 3 enterprise partners
- Delivered the Public Underwriting API, aggregating underwriting decisions for single and joint life applications and supporting localized flows and deferred-decision statuses

Frontend Developer • VP Software (Kharkiv, Ukraine)
Apr 2020 – Apr 2022 • On-site • Software outsourcing company for European clients

- Built CMS-driven tire catalogs, a Google Maps dealer locator, and a 7-page Sustainability section with Recharts for Prometeon Tyre Group, localized across 9 countries with Arabic RTL support; authored ~49% of the JS/SCSS codebase
- Migrated Prometeon's core modules from Apollo to Directus REST APIs and implemented Next.js SSR across 30 pages, serving fully rendered HTML for regional product listings to improve search crawlability
- Built a schema-driven ticketing system and visibility-scope module for Allthings, a property management SaaS, across web and React Native apps, letting teams add service forms from GraphQL-served JSON schemas without an app release
- Modernized Allthings' React Native app and TypeScript chat microservice on AWS Lambda, upgrading frameworks and runtimes for current iOS/Android and Node.js versions and splitting 900+ line components into smaller, typed components and hooks

Frontend Developer Intern • VP Software (Kharkiv, Ukraine)
Jun 2019 – Mar 2020 • On-site • Software outsourcing company for European clients

EDUCATION

Master of Science, Software Engineering - AI Engineering • WGU • Expected graduation: 2027
Master's Degree in Public Administration • Kharkiv Regional Institute of Public Administration • 2013
Master's Degree in Law • Yaroslav the Wise National Law University • 2010

CERTIFICATIONS & COURSEWORK

- Introduction to Python Programming, WGU Academy (2026)
- Building with the Claude API, Anthropic Education (2026)
- Meta Front-End Developer Professional Certificate, Coursera (2023)
- CSS for JavaScript Developers, Josh W. Comeau (2025)
